WORK EXPERIENCE

- **SenseTime Ltd.** — Shenzhen, China
  Research Intern, supervised by [Prof. Ping Luo](), [Dr. Ziwei Liu](), and [Dr. Ruimao Zhang]() — *Sep 2018 - March 2019*
  - **CelebAMask-HQ [450+ stars, 70+ forks][link]**: (1) We present MaskGAN for diverse and interactive face manipulation. (2) We contribute CelebAMask-HQ, a large-scale high-resolution face dataset with mask annotations.
  - **Switchable Normalization on Generative Adversarial Network**: To increase the stability of GAN, we discover the probability of learning to select different normalizers (e.g. layer normalization, instance normalization, and spectral normalization) for different layers of a discriminator by meta-learning.

- **National Taiwan University** — Taipei, Taiwan
  Research and Teaching Assistant, supervised by [Prof. Winston H. Hsu]() — *Sep 2016 - Aug 2018*
  - **Research Assistant - Communications and Multimedia Lab**: Research mainly focuses on deep learning, generative model and low-level vision including: super-resolution on facial images and image synthesis.
  - **Teaching Assistant**: Linear Algebra (2017 Fall), Digital System Design and Laboratory (2017 Spring, **Outstanding TA Award**)), and Seminar Class (2016 Fall).

- **QNAP Systems** — Taipei, Taiwan
  Software Engineering Intern, supervised by [Mr. Paul Chu]() — *July 2016 - Aug 2016*
  - **Implement an universal cloud client of Slack**: Integrate the application of QNAP NAS (Network-Attached Storage), Connect To Cloud Drive, with Slack. Enable users to synchronize files between Slack and QNAP NAS.
